Key Functions of APEDA

APEDA registration is a basic certificate for exporters who are dealing in scheduled agricultural and processed food products.The main functions and objectives of APEDA

1. **Registration of Exporters**
    - Issuing the Registration-Cum-Membership Certificate (RCMC) to required exporters of scheduled products.
    - Enables exporters to access APEDA schemes and export-related benefits.
2. **Export Promotion**
    - Promotes exports of agricultural and processed food products from India.
    - Supports exporters in exploring and developing international markets.
3. **Financial Assistance**

- Assistant in providing financial support for market development, infrastructure creation, quality improvement, surveys, and feasibility studies.

4. **Quality Standards and Certification**
    - Fixes standards and specifications for export products.
    - Helps ensure compliance with international quality and safety requirements.
5. **Inspection and Quality Control**
    - Conducts inspections of certain products (especially meat and meat products) to maintain export quality standards.
6. **Packaging and Marketing Improvement**
    - Encourages better packaging methods and branding.
    - Promotes Indian agricultural products in overseas markets.
7. **Export-Oriented Production Development**
    - Supports the development of industries related to exportable agricultural products.
    - Encourages production aligned with international market demand.
8. **Training and Capacity Building**
    - Organizes training programs for exporters, processors, and other stakeholders involved in agricultural exports.
9. **Data Collection and Market Intelligence**
    - Collects and publishes statistics related to production, processing, packaging, marketing, and exports of scheduled products.
